

LEARNING EVIDENCE 2: PROBLEM AWARENESS & NEED RECOGNITION

NAME: John Michael M. Inoc
PROGRAM AND YEAR: BSCpE - 3
EMAIL ADDRESS: inocjohnmichael1@gmail.com

- A. KNOW WHY!** Enumerate **THREE (3) STARTUP BUSINESSES** and explain how they were able to come up with such concept/business. (What inspired them to come up with their businesses? Was it established out of passion, complaint, ego, etc?). If possible, site some specific stories.

STARTUP BUSINESS	BRIEF DESCRIPTION	HISTORY
1. Kangkong Chips by Josh Mojica	<i>A Filipino snack brand transforming kangkong (water spinach) into crunchy chips in multiple flavors.</i>	<i>The idea came from Josh Mojica's aunt, who used to cook kangkong as a tasty snack. Inspired by this, and encouraged by his grandfather, Mojica decided to make and sell kangkong chips in June 2021. He was driven by passion and the need to help his family financially, rather than following a traditional career path. Within six months, he was already earning a great amount monthly. His journey went viral when he shared his view on "Diskarte o Diploma," saying his self-earned knowledge and resourcefulness (diskarte) inspired him more than the formal school system.</i>
2. Underground Apparel by Joseph Sabello (Ungart)	<i>A Cebu-based streetwear and lifestyle brand featuring minimalist, edgy, and accessible fashion inspired by underground culture.</i>	<i>The roots of UA go back to Joseph Sabello's college years, when he began designing and selling T-shirts for his department's freshmen students. This small venture sparked his passion for fashion design and branding. With the support of co-founder Joannah Jane Sy, he expanded this vision into Underground Apparel, aiming to provide affordable yet premium-quality streetwear for Filipinos. In December 2024, UA opened its flagship store in Cebu, designed with a cave-inspired aesthetic by Sabello (an Architecture graduate) and Architect Nicole Macasero. The store's grand opening attracted 1,000+ streetwear fans, proving that</i>

		<i>UA had become not just a brand but a cultural movement in Cebu.</i>
3. Duolingo	<i>A language-learning application known for its gamified approach, quirky mascot Duo the owl, and accessibility through a freemium model (free version + premium upgrades).</i>	<i>Duolingo was created in 2011 by Guatemalan-American professor Luis von Ahn and his student Severin Hacker at Carnegie Mellon University. Von Ahn, who grew up in Guatemala, explained: "I grew up in a country where you had to learn English if you wanted to be mildly successful." This passion for educational equity inspired him to create an app that could make learning English (and later, 40+ other languages) free and accessible to all. Their innovation was driven by both personal experience (passion + social purpose) and the idea that English is "transformational" in non-English-speaking countries.</i>

B. HOW ABOUT YOURS? Identify **THREE (3) PROBLEMS, NEEDS, or FRUSTRATIONS** you have seen, felt, or observed. You can base your idea from Drucker's Seven Sources of Innovation.

PROBLEMS/NEEDS/ FRUSTRATIONS	CATEGORY (Ex. Health, Education, etc.)	PRIORITY RANK (1-HIGH, 3-LOW)
1. Long waiting lines in government services	<i>Services</i>	2
2. Slow or even no signal in most areas	<i>Technology</i>	3
3. Lack of recycling or waste segregation practices in communities	<i>Environemnt</i>	1
